

Ashis Barik

Cell: (91) 6370324741
Email: akb91ashis@gmail.com

Over 10+ years of IT experience with strong expertise in building scalable web applications. 8+ years in frontend development (React.js, Redux Toolkit, modern JavaScript), including 2 years of full-stack experience using React.js and Node.js, along with earlier experience in PHP and MySQL.

Proficient in the React ecosystem, state management, REST API development/integration, and application optimization. Experienced with CI/CD, Git, and Agile methodologies. Leveraged AI tools like OpenAI Codex and GitHub Copilot for code generation, debugging, and improving development efficiency. Strong problem-solving, collaboration, and mentoring skills.

PROFESSIONAL EXPERIENCE

NEXTGEN INVENT PVT.LTD,
Senior Software Engineer

November 2022–Present

Contribution :

- Lead a cross-functional team by driving daily stand-ups, tracking progress, resolving blockers, and ensuring smooth execution of sprint commitments. Provide regular status updates and highlight risks to stakeholders and management.
- Own sprint execution by collaborating with product owners during planning and refinement sessions, ensuring stories are clearly defined, properly estimated, and aligned with business priorities.
- Establish and enforce code quality standards through detailed pull request reviews, ensuring maintainability, scalability, and adherence to best practices across the codebase.
- Manage end-to-end release flow, including merging code to development branches, coordinating deployments to lower environments, and ensuring readiness for QA and production releases.
- Drive technical decision-making and mentor team members, enabling knowledge sharing and improving overall team productivity and engineering standards.
- Identify performance bottlenecks and proactively implement optimizations, resulting in improved application efficiency and better user experience.
- Oversee integration strategies with external systems and services, ensuring reliable communication, fault tolerance, and simplified architecture.
- Contribute to backend and frontend enhancements by designing scalable solutions and extending system capabilities to support evolving business requirements.

Projects :

MedTel

Medtel's SurgiScript transforms surgical care coordination by streamlining processes and enhancing communication across physician practices, surgical facilities, and both internal and external teams. From surgeons and nurses to administrators and vendors, this platform ensures every stakeholder is seamlessly connected and informed. The result is a more efficient, collaborative environment that reduces administrative burdens, optimizes workflows, and drives significant financial performance improvements.

Technologies Used

React Typescript, Redux Toolkit, React Router, Axios, Material UI, SCSS, Azure DevOps (CI/CD), Bitbucket as version control. JWT-based Authentication, Role-Based Access Control (RBAC)

AI Tools: OpenAI Codex (AI-assisted code generation, debugging, refactoring, and test creation)

ProcedureSite(MedTel)

Developed a scalable and secure admin panel for managing medical procedures, users, and system workflows. Implemented role-based access control (RBAC), dynamic data management, and real-time updates to streamline operational efficiency. Built responsive UI components and optimized API integrations for better performance and user experience.

Technologies Used

React (with TypeScript), Redux Toolkit, Node.js, Express.js, Firebase Firestore (NoSQL DB), Firebase Auth, REST APIs, SCSS, MUI, Bitbucket, Axios

AI Tools: OpenAI Codex (AI-assisted code generation, debugging, refactoring, and test creation)

OTSY

Developed a scalable admin panel for Otsy, a social travel platform supporting 350,000+ experiences across 170+ countries. Implemented features for user management, experience and booking administration, and content moderation. Integrated APIs for real-time data handling and ensured secure, role-based access control for administrative operations.

Technologies Used

React.js (Next.js), TypeScript, Redux Toolkit, React Router, Axios, Material UI, SCSS, GraphQL, Azure DevOps (CI/CD), GitHub (Version Control), JWT-based Authentication, Role-Based Access Control (RBAC)

AI Tools: GitHub Copilot (AI-assisted code generation, debugging, refactoring, and test creation)

PlantOPS

PlantOPS is a digital manufacturing solutions provider specializing in Manufacturing Execution Systems (MES) and process automation for life sciences industries, including pharmaceuticals, biotech, and consumer products. The platform enables organizations to streamline manufacturing operations through system integration, electronic batch records, real-time data insights, and regulatory-compliant workflows.

Technologies Used

React Typescript, Redux Toolkit, React Router, Axios, Material UI, SCSS, Azure DevOps (CI/CD), Bitbucket as version control. JWT-based Authentication, Role-Based Access Control (RBAC)

TECH TAMMINA PVT.LTD,

Senior Software Engineer

May 2020–October 2022

Contribution :

- Accessing project requirements using Agile and Scrum principle related to high-volume online services that helped prioritize developing activities and reduce ad hoc work request.
- Conducting requirements gathering and validation as a part of collaboration for the external web app that helped to address important UI/UX parts of the system's user interface before the active phase of development.
- Identification and implementation of the critical code improvements for the web app that helped to tune performance and decrease average response time.
- Integrating with third-party services and external APIs as a part of implementation of the single page app resulting in decrease of the system's complexity.
- Implementation of the set of new API endpoints related to the web app that provided critical connectivity channel for distributed functionality and increase system cohesion keeping manageable code complexity.

Projects :

CPM-ELS

eBook Licensing System solution for the staff and faculty under CPM Educational Program. This application is to view and manage eBook license utilization, schools reported under the district, classes of the schools, Users (Teachers, Students and other staff) etc. Currently ELS provide 3 different user interface based on the role of the individuals as Parent Workflow, Teacher Workflow and District Admin Workflow.

Technologies Used

React JS, Redux, React Router, Axios, NPM, Material UI, SCSS, Circle CI for continuous integration, Bitbucket as version control.

OIC Payroll automation

The scope of the project is to automate the manual task of cross-check, verification, notify respective managers and process 4 areas which are Time & Attendance, Deductions, Payroll processing, Payment Distribution and thus address the problem statements.

Technologies Used

React JS, Redux, React Router, Axios, NPM, HTML5, SCSS, Bitbucket as version control.

CLICKMAIL SOLUTIONS PVT.LTD,
Software Engineer

April 2018–March 2020

Contribution :

- I was working as a FE developer and developed several modules with a proper handshake with BE team. Involved directly with ClickMail on requirement gathering and status update on daily scrum.
- Build a custom analytics system to track different activities of customers i.e. Conversion Tracking, Funnel Tracking and Pages Tracking using tools like Google Analytics and Developed a JS prototype to achieve above requirements.
- Developed a calendar to show Email Sent, Email Schedule, Custom and System notice in a Year, Month and Date view. Used a react full calendar module available via NPM and customize it based on client requirements.
- Worked on to allow customer to configure their own RSS feeds in the app. They can customize the RSS content the way they want to send it in their email and then use it as their email content.
- Worked on Facebook Lead Ads API integration in our email marketing app which allows customers to collect their user's information from Facebook in to app DB.

Projects :

IPost

An enterprise Email Service Provider (ESP) Solutions. iPost puts the power of customer data and email in your hands with a powerful, easy-to-use platform that integrates simply with other best-in-class marketing tools—empowering marketers and driving immediate ROI.

Technologies Used

React JS, Node JS, Express JS, HTML5, CSS3, SASS, Gulp, Webpack, Git, MySQL

Contribution :

- Wrote and implemented scripts to enhance user experience and integrated scripts with the CMS.
- Designed and developed transactional and analytical data structures.
- Implemented innovative systems for data collection, storage and management of customer orders.
- Maintained existing applications and designed and delivered new applications.
- Developed code fixes and enhancements for inclusion in future code releases and patches.

Projects :

MUVI

It is a PaaS-based Video Streaming solution that enables content producers and owners to have and operate their OTT Multi-Screen Video Streaming service right off the bat. The platform allows users to customize their video streaming service to reflect their brand, and works completely in accordance with their business and operational rules. The best part about it is that both medium and large business can benefit from its features, as there is a separate plan for each of them.

Technologies Used

PHP, MySQL, HTML5, CSS3, Javascript, jQuery, Ajax, Angular JS, Mongo DB, AWS etc.

Contribution :

- Developed and maintained PHP based platform. Responsible for core back-end technology development including analysis, design, coding. Coded 10+ website.
- Development of reusable code and implementation of Core functionality and support tools.
- Understand the business and functional requirements and handled the CMS (Front End programming).
- Iterative testing, debugging and code reviews through development of the application.

Projects :

- <https://22bikes.in/>
- <https://alconlink.com/>
- <https://rentseeker.in/>
- <https://sanjivani-infotech.com/>
- <https://enigmainfra.com/>
- <https://landco-oman.com/>
- <https://indusvalleytimes.com/>
- <https://jeir.org/>

Technologies Used

PHP, MySQL, HTML, CSS, Bootstrap

SKILLS

- *JavaScript Libraries / Frameworks:* React.js (Next.js), Redux Toolkit, React Router
- *Programming & Technologies:* TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Axios, Material UI, PHP(5/7)
- *Backend / Full Stack:* Node.js (Express JS), REST API Integration, GraphQL
- *Authentication & Security:* JWT-based Authentication, Role-Based Access Control (RBAC)
- *Database:* MySQL, MongoDB (Basics), Firebase Firestore
- *DevOps & CI/CD:* Azure DevOps (CI/CD Pipelines)
- *Version Control:* Git, Bitbucket
- *Web Services:* REST APIs (JSON), GraphQL APIs
- *Tools & Debugging:* Chrome Developer Tools, React Developer Tools
- *AI Tools:* OpenAI Codex, GitHub Copilot (AI-assisted code generation, debugging, refactoring, and test creation)

EDUCATION

- B.Sc.(IT) from NIIT(Bhubaneswar) in 2012
- Higher Diploma in Software Engineering from NIIT(Bhubaneswar) in 2010
- Intermediate from CHSE (Odisha), VSS Inst. Of Science, Sambalpur, ODISHA in 2008
- Matriculation From BSE (Odisha), Mura High School(Mura), Sambalpur(ODISHA) in 2006
